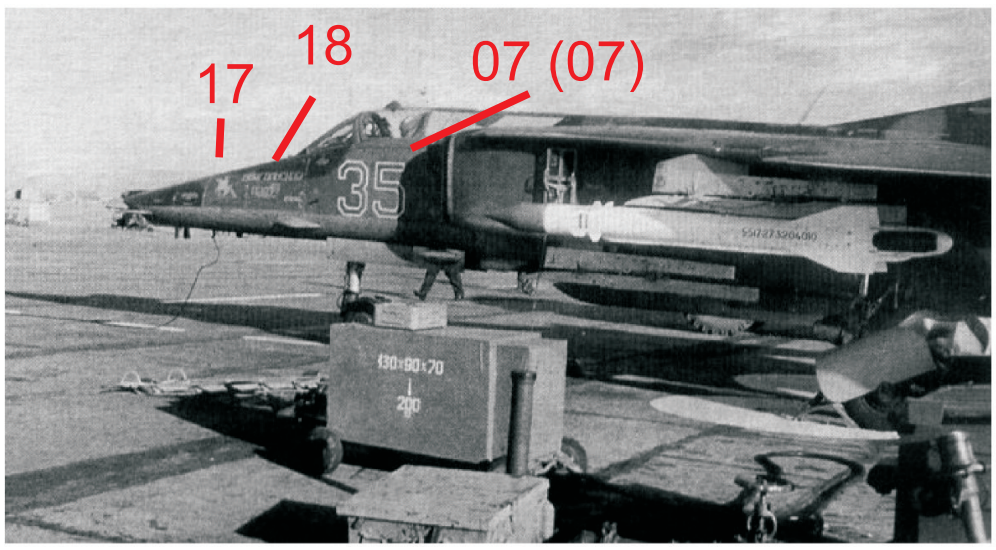
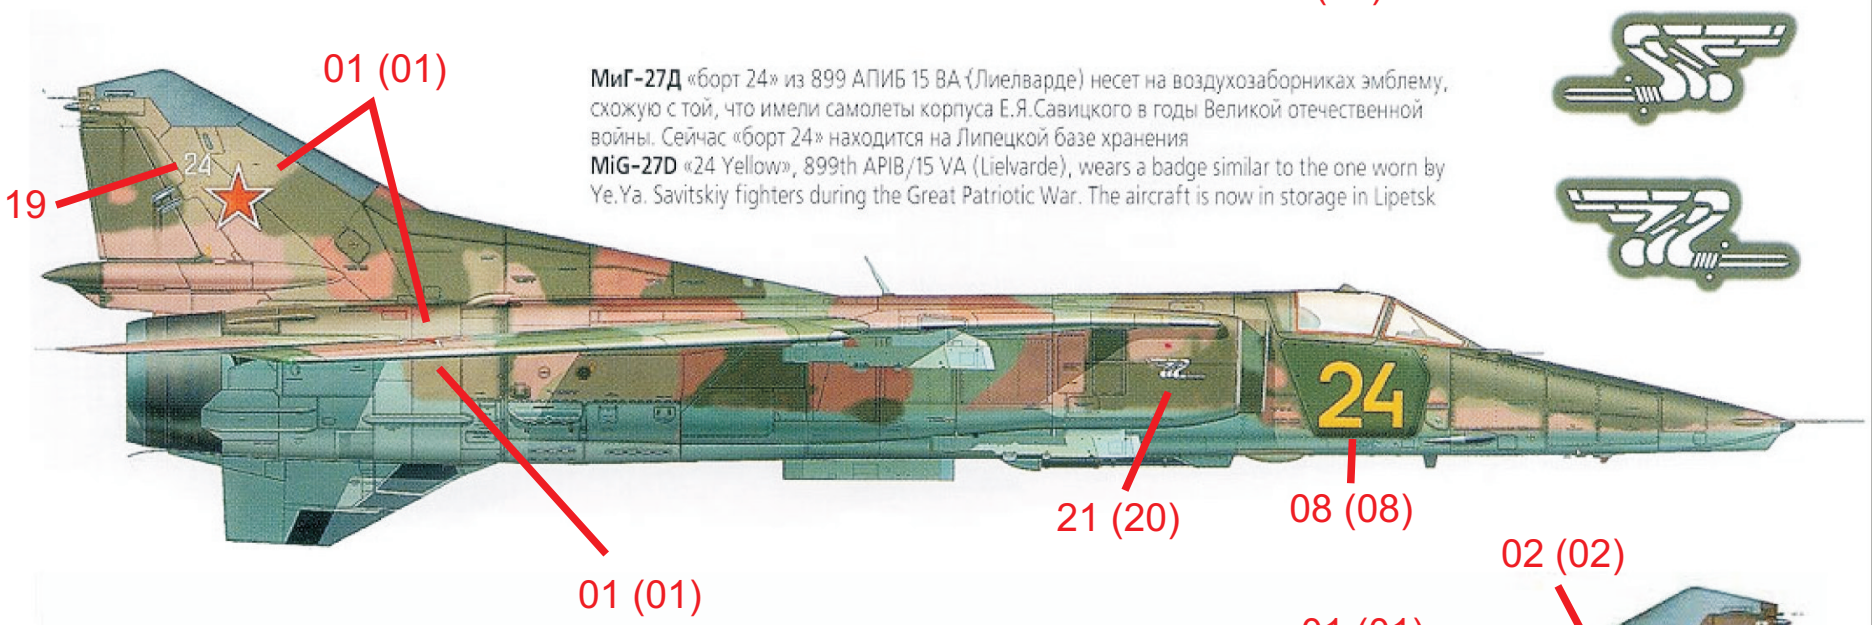
Mikoyan MiG-27 D & K decals

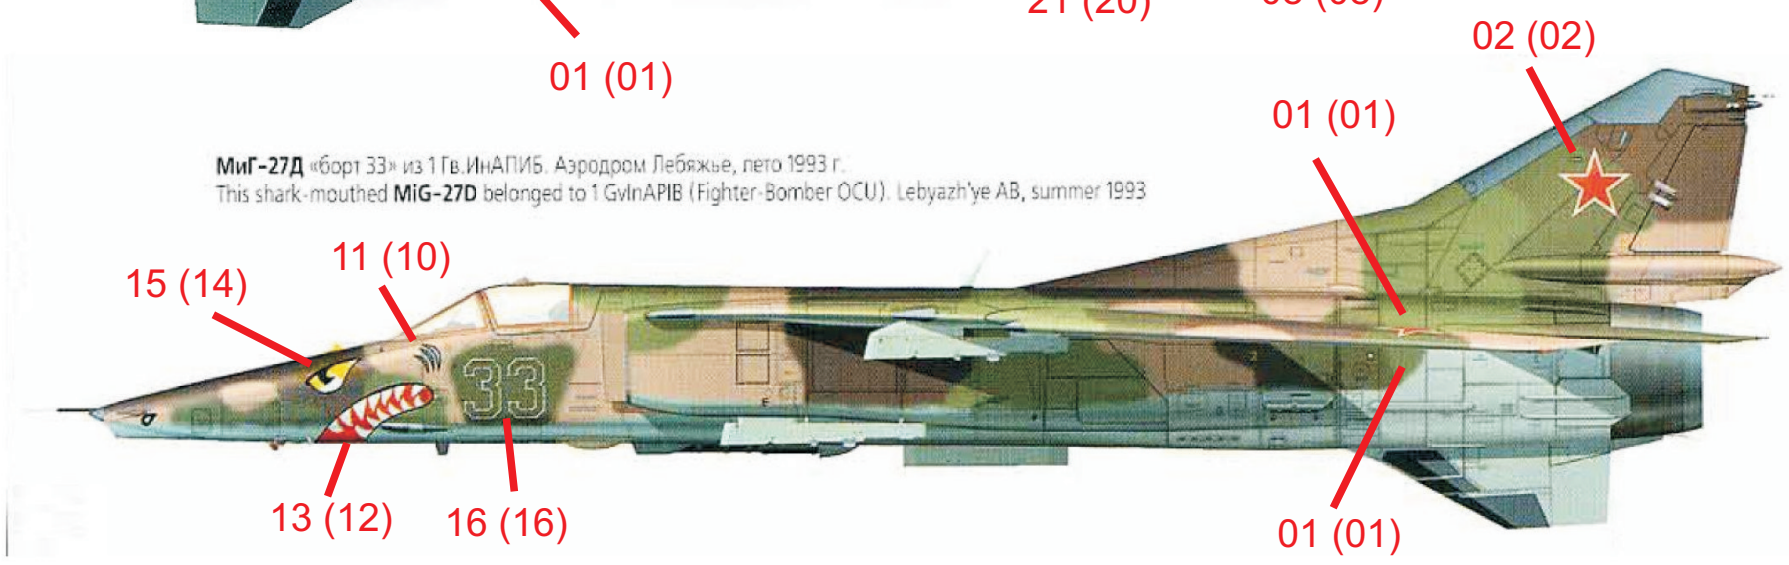
in 1/48 scale



MiG-27 K

На носу МиГ-27К из приморского 18-го гв. апиб – эмблема, служившая отличительным знаком 1-й эскадрильи полка ещё в годы Великой Отечественной войны





It is very difficult to give correct colour call outs for these Soviet Air Force aircrafts. In general they are painted in 4 colors (Green, Dark Green, Sand and Brown) on their upper surfaces and Grey-blue underneath. The shades very much depend on the local specifics and the wear. The colours quickly fade under harsh weather conditions. Unfortunately we could find only these 2 black and white photos of the two proposed MiG-27 K aircraft. I recommend using the Soviet/ Russian line of Colours of AKAN or mixing your own.
